Office Action Summary	Application No. 10/540,598	Applicant(s) BRAUN ET AL.	
	Examiner Davis D. Hwu	Art Unit 3752	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 10, 17, and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Schaeffer.

Schaeffer shows a spray fitting comprising: a main pipe 48 formed with two channels (Figure 4); a plurality of distributing pipes 22a-d and 24a-d extending from two sides of the main pipe essentially in one plane; and a plurality of spray nozzles with each distributing pipe, and a pump 14 as recited. The device is fully capable of being installed in a tower to treat a gas flow with a liquid.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 11, 13-16, and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schaeffer.

Schaeffer also discloses a sheet in the main pipe (part separating the channels in Figure 4) but does not disclose supply of the treatment liquid at opposite ends of the

channels, however, such a modification would have been a matter of design choice since such a modification would have involved a mere duplication of the essential working parts of a device to supply liquid. Claims 13-16 are also matters of design choice since they involve mere changes in the placement of objects and the sizes of components which are recognized as being within the level of ordinary skill in the art. The device can be used in a tower and in which case, a tower would be included as part of an entire system comprising the device and the tower.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Goodricke is pertinent to Applicant's invention.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Davis D. Hwu whose telephone number is 571-272-4904.
